

CHAPTER -1 BASIC OF INFORMATION TECHNOLOGY

Q.1 Define: Information Technology

Q.2 Define: Computer

Q.3 Explain Computer System and state its functions.

Q.4 Explain the term Computer Architecture.

Q.5 Write short notes on

1. Input Device

2. Central Processing Unit

3. Output Device

Q.6 Distinguish between RAM and ROM.

Q.7 Explain Primary memory and Secondary Memory with help of examples.

Q.8 Distinguish between Hardware and Software.

Q.9 Distinguish between Open Source software and Closed Source software.

Q.10 Distinguish between application software and system software.

Q.11 Explain what is operating system and state its functions.

Q.12 Explain different operating system for personal computers.

Q.13. Explain different operating system for mobile phones.

Q.14 Distinguish between GUI and CUI.

Q.15 Explain different types of networks.

Q.16 Distinguish between

1. LAN and MAN

2. MAN and WAN

3. LAN and WAN

Q.17 Distinguish between Peer –to=Peer architecture and Client Server architecture.

Q.18 Explain different types of internet protocol.

Q.19 Explain different careers in IT.

Q.20 Explain recent trends in IT.
